

Personal statement

Biotech professional with GMP-compliant manufacturing experience supporting late-phase gene therapy programmes. Currently working within upstream production at MeiraGTx, contributing to programme execution through material coordination, documentation, deviation management, and cross-functional collaboration across Manufacturing, Quality, MSAT, and Supply Chain.

Experienced in aligning material usage with Batch Manufacturing Records, supporting change control, and maintaining accurate documentation to ensure programme readiness and compliance. Strong background in coordinating workflows, tracking critical activities, and ensuring timely delivery of clinical manufacturing objectives within regulated environments.

Highly organised, detail-oriented, and comfortable managing competing priorities across multiple programme activities. Motivated to apply operational, coordination, and supply chain expertise to support end-to-end programme delivery in genetic medicine supply.

Professional Experience

Bioprocessing Scientist, MeiraGTx, Old Street / London

(December 2022 – Present):

- Executed upstream processing for AAV vector production, including **cell expansion, media/buffer prep, and bioreactor monitoring** in a cGMP environment.
- Led **process deviation investigations**, performing **root cause analysis and corrective/preventive actions (CAPAs)** to improve process robustness.
- Contributed to **technology transfer** activities for clinical-scale viral vector production.
- Ensured continuous **inspection readiness** by maintaining compliance with regulatory and quality standards.
- Lead a cross-functional BOM and BMR alignment project to **improve material traceability, reduce waste, and ensure accurate material allocation**

Senior Scientist, Cignpost Diagnostics, Stratford / London

(October 2021 – May 2022):

- Directed **lab operations**, ensuring **compliance with GLP/GMP** while implementing **quality management systems**.
- Spearheaded **PCR-based diagnostic testing**, supervising the **development and validation of analytical methods**.
- Trained and mentored lab staff in **SOPs, quality control, and troubleshooting protocols**.

Scientist/ Laboratory Technologist, Halo, White City / Heathrow

(November 2020 – October 2021):

- Developed and optimised molecular diagnostic assays, including RT-qPCR and LAMP techniques.
- Led R&D initiatives to improve throughput and diagnostic accuracy.
- Maintained compliance with regulatory standards through SOP development.

Pharmacy MDU Chemotherapy Coordinator, The Royal Marsden NHS, South Kensington

(December 2014 – July 2015):

- **Supported chemotherapy workflows:** Coordinated the preparation and delivery of chemotherapy drugs, ensuring accurate and timely distribution to the oncology day unit across multiple hospital sites.
- **Developed efficiency tools:** Created and implemented Excel macros using Visual Basic to streamline workflow processes, reducing errors and improving operational efficiency.

Education

University College London (UCL)

(September 2019 – December 2020):

MSc Nanotechnology and Regenerative Medicine

- **Dissertation:** “The Nanoparticle Delivery of Ambroxol Across the Blood-Brain Barrier to Treat Parkinson’s Disease”.
- Developed expertise in nanoparticle engineering, bioinformatics, qPCR, RNA QC, and gene expression analysis.
- Key modules: Biomaterials, Tissue Engineering, Translational Research (Lab-to-Market).

Queen Mary University of London

(September 2015 – August 2019):

BSc Biochemistry

- **Dissertation:** “Xanthophylls of Light-Harvesting Antennae: Structure and Role”.
- Explored molecular biology techniques, bioinformatics, and protein purification.
- Key modules: Neuroscience, Bioinformatics, and Protein Characterisation.

Key Skills and Achievements

- **First aid and Mental Health First Aid Certification**
- **Mammalian Cell Culture:** Adherent & suspension culture, shake flasks, single-use bioreactors (SUBs)
- **Upstream Processing (USP):** Cell revival, media/buffer preparation, process monitoring, scale-up
- **GMP Compliance & Documentation:** SOPs, batch records, deviations, CAPAs, technology transfer
- **Process Troubleshooting:** Root cause analysis (RCA), deviation investigations, risk assessments
- **Regulatory Experience:** FDA & EMA compliance, Pre-Approval Inspections (PAIs), quality audits
- **Mentoring & Training:** Coaching new team members, technical knowledge transfer
- **Equipment & Systems:** NetSuite, UPMRs, MIAFs, IOQs, Single-Use Systems (SUS)
